EDUCATION

B.Tech in Data Science

Newton School of Technology
Rishihood University
2024 – 2028
CGPA: 7.0 / 10.0

TECHNICAL SKILLS

Python SQL NoSQL
Pandas NumPy
Matplotlib Seaborn
Scikit-learn
Tableau Power BI
Looker Studio
Streamlit Excel
PostgreSQL MySQL
MongoDB Supabase
Git GitHub Docker

CORE STRENGTHS

Data Cleaning
Data Wrangling
Exploratory Data Analysis
Dashboard Design
Forecasting
Statistical Analysis
Data Storytelling

LIVE LINKS

Brazilian Ecommerce
Movie Dashboard
AI Job Dashboard
Crime Dashboard

PROFILE

Data Analyst skilled in Python, SQL, and analytics workflows from data cleaning to insight delivery. Experienced in Tableau, Looker Studio, Power BI, and Streamlit dashboards for decision-making. Strong in EDA, statistical analysis, forecasting, and turning complex datasets into business stories. Comfortable working across databases, BI tools, and stakeholder-facing analytics projects.

INTERNSHIP

Data Science & Analytics Intern — May – Jul 2025

Labmnetix, Remote

- Built optimized Python pipelines using Pandas and NumPy for 10,000+ records, reducing runtime overhead by 25%.
- Applied unsupervised ML and statistical analysis on real-world datasets to surface actionable business insights.
- Redesigned workflows using modular architecture, improving scalability and reducing codebase redundancy.

PROJECTS

Brazilian Ecommerce Analytics Suite — April 2026

GitHub Repo | Live Demo

- Built a Tableau analytics suite to explore ecommerce sales, customer behavior, product performance, and revenue trends.
- Analyzed order, payment, and delivery patterns to surface insights for sales optimization and operational reporting.

AI Job Trends Engine — April 2026

GitHub Repo | Live Demo

- Analyzed global AI job market data to identify salary trends, skill demand, and hiring patterns using EDA.
- Built Tableau dashboards showing experience-salary correlation and industry demand shifts.

Crime Forecasting Hub — March 2026

GitHub Repo | Live Demo

- Mined historical crime records to detect temporal patterns, seasonal spikes, and high-risk locations.
- Built forecasting dashboards to support public safety planning and resource allocation.

Movie Intelligence Grid — April 2026

GitHub Repo | Live Demo

- Designed a Streamlit recommendation dashboard with filters for genre, rating, and similarity metrics.
- Implemented an end-to-end processing and visualization pipeline for real-time movie discovery.

LEADERSHIP

- **Team Lead – Smart India Hackathon:** Directed a data-focused AI/ML project, coordinated execution, and delivered technical milestones on schedule.
